    PLANO, Texas - EDS and Continental Airlines have designed an **electronic** system expected to speed up the **Customs** and Immigration process.
    The Advanced **Passenger Information** System (APIS) moves trans-continental travelers through U.S. Customs and Immigration at airports faster.
    APIS lets an airline collect, monitor, and send **passenger information** to U.S. Customs and Immigration before passengers arrive on certain international flights.
    Industry observers...

Customs law gets a facelift
Chan, Rico
China Business Review v28n2 PP: 30-34 Mar/Apr 2001
ISSN: 0163-7169 JRNL CODE: CHB
WORD COUNT: 3767

...TEXT: systems and EDI

With the increasing reliability and popularity of the Internet, both local and **foreign** firms have growing expectations for e-commerce (businessto-business, business-to-consumer) as well as...

...on Customs Procedures.

Article 25 of the amended Customs Law states that import and export **customs declarations** shall be submitted in paper **form** and **electronic form** . During the drafting process, there was a lengthy debate over whether Article 25 should read paper form or **electronic form** . In the end, the consensus was that most local Customs administrations in China are not yet ready to handle **customs declarations** in **electronic form** only.

Customs has nevertheless been experimenting with the use of electronic communication and networking technology for quite...

... Port projects. These projects aim to build a national communication network to link China's **foreign** trade, customs, tax, and **foreign** -exchange control systems. For example, since January 1, 1999 exporters have been required to complete " **foreign** -exchange settlement verification" via a computer system that has been networked between Customs and the State Administration of **Foreign** Exchange (SAFE). In addition, starting from September 30, 2000, all import licenses have been applied for and granted electronically via a computer system that links Customs and the Ministry of

Foreign Trade and Economic Cooperation (MOFTEC).

Since 1994, Customs has been experimenting with a pilot computer...

... interchange (EDI) terminals installed at local Customs offices. Next, the information is reviewed by the **Declaration** **Forms** Review Section of the local **Customs** office. After review, the parties are asked to submit their **customs** **declaration** **forms** and supporting trade documents. Other sections of the local Customs office are notified of each...

**SURVEY - FT-IT REVIEW: Just the ticket for tackling excess traffic:
  E-TICKETING by Mark Vernon: Progress will be limited unless airline
  commitment is more clearly demonstrated, notably in terms of the IT
  investment necessary to integrate systems**
MARK VERNON
Financial Times, Surveys ITK1 ED, P 7
Wednesday, November 3, 1999
DOCUMENT TYPE: Surveys; NEWSPAPER LANGUAGE: ENGLISH   RECORD TYPE:
FULLTEXT SECTION HEADING: SURVEY - FT-IT REVIEW
Word Count: 929

...as no surprise that business flyers are eager for e-ticketing. The 1999
Company Barclaycard **Travel** in Business survey showed that respondents
representing companies with a turnover of Pounds 10m are most enthusiastic
about ticketless **travel** , with 22 per cent having already used it.

Nearly all business passengers say they would use ticketless **travel**
again, although the survey also identified common problems. For example, 5
per cent say they...
...service check-in kiosk. But the true e-ticket of the future will be a
travel ticket, passport and **visa** combined in **electronic**   **form** on a
smart card.

"Electronic ticketing systems are being developed by several airlines and
although they give a short-term advantage to the pioneers, for
international   **travel** they will have to become part of the infrastructure
of the industry," says John Watson, director-general of Sita, a partner in
the development of Etas (Electronic **Travel** Authority System). "There
needs to be very close industry co-operation to overcome the complexity of
the **international** environment."

So progress will be limited unless airline commitment is more clearly
demonstrated, notably in...

AB-  <BASIC> EP 379333 A
```

AB- <BASIC> EP 379333 A

At least one portable electronic device communicates with at least one terminal device. The portable device (4) verifies that the terminal device (3) is a valid one. The terminal device verifice that the portable device is valid. Further verification is performed to ensure that the user is authorised to use the system. A protection device prevents tampering with a terminal, and decodes data at the interface between the portable device and the terminal device. ADVANTAGE – The system provices security against unauthroised access. The invention has use in the fields of automatic banking, automatic credit and debit transactions, passport and **travel visa** verification, health and medical **records** , security access, licensing and any other like field where fraud may pose a problem.
     Dwg.3/3|

AB- <EP> EP 379333 B

A system for the secure interchange of information comprising: at least one portable electronic card (4) having a memory for storing program algorithms and data therein including valid terminal verification data and valid user identification request data; at least one terminal device (3) adapted to receive and communicate with said portable electronic card; said card (4) including: means for communicating with said terminal (3); means for monitoring, for a predetermined period of time, immediately following insertion of said card (4) in said terminal (3), an output from said terminal (3) for a terminal verification message and being operable to erase said memory

when said terminal verification message is not received message is not received within said predetermined period of time, and being responsive to said terminal verification message received within said predetermined period of time, by comparing said received terminal verification message to said stored valid terminal verification message and being operable to erase said memory when said received terminal verification message is not valid; and means for monitoring, following receipt of a valid terminal verification message, the output from said terminal (3) for a user identification request and being responsive to said user identification request by comparing said received user identification request to said stored valid user identification request and being operable to erase said memory when said user identification request is not valid; said terminal device (3) including: means for transmitting to said card (4) in said terminal (3); means for monitoring, for a second predetermined period of time a card output for receipt of a card verification message and being operable to reject said card (4) when said card verification message is not received within said second predetermined period of time by comparing said received card verification message to a stored valid card verification message, and being operable to reject said card (4) when said received card verification message is invalid; means for reading a user identification from said user following receipt of a valid card verification message; means for transmitting to said output a user identification request; and means for monitoring said card output for receipt of said predetermined user information and being responsive to said predetermined user information for comparing said received predetermined user information to said read user identification, and being operable to reject said card (4) when said predetermined user information is invalid.

(Dwg.1/3)|

AB- <US> US 5239166 A

The electronic card includes a device for monitoring, for a predetermined period of time, immediately following insertion of the card in the terminal, an output from the terminal for a terminal verification message. The monitor is operable to erase the memory when the terminal verification message is not received within the predetermined period of time and is also responsive to the terminal verification message received within the predetermined period of time, by comparing the received terminal verification message to the stored valid terminal verification message and is operable to erase the memory when the received terminal verification message is not valid.

A second device monitors, following receipt of a valid terminal verification message, the output from the terminal for a user identification request and is responsive to the user ID request by comparing the received user ID request to the stored valid user identification request. This monitor is operable to erase the memory when the user identification request is not valid and being operable to erase the memory when the received request is an attempt to read data from the memory before receipt of the valid user identification request.

USE/ADVANTAGE - for use in secure data interchange system i.e. providing information and services e.g. automatic banking, automatic credit and debit, passport and **travel** visa verification. Highly fraud proof.

AB- <BASIC> AU 9517904 A
      The special multifunctional applications for contact and/or
contactless data transmission systems via microprocessor cards includes
the microprocessor card which works on the radio frequency base which
can be implemented with hard-wired logic, and is multifunctional,
enabling several independent functions to be united on one card.
      One application is to store biometric characteristics of the card
holder on the card which are unique and non-transferable and present an
unerring possibility of identification of the card user. Especially the
three-dimensional geometry of the hand and/or face of the card owner is
stored on the card, from where these data can be called in for the
identification of the user by special readers without annoyance of the
card holder. Another application can present an electronic flight
ticket which enables new time saving and check-in controls for air
 travelling . Other applications include multifunctional credit card,
electronic passport and/or **visa** , and electronic driving licence
 applications .
      USE/ADVANTAGE - For unerring identification of persons at border
crossing or control of persons domestically, and also for air **travel**
for executing air **travel** formalities such as passenger booking,
re-booking, flight tickets, reservations, check-in, ticket control at
gate or boarding, individual information and payment of expenses.
Increases speed of e.g. passport control as electronic passport does
not have to be taken out of persons wallet or bag for checking.

01277931 ORDER NO: AAD93-05413
A DESCRIPTIVE ANALYSIS OF CURRENT CUSTOMS , **TRADITIONS AND ETIQUETTE IMPACTING UPON POSITIVE** INTERNATIONAL **SPORTS COMPETITION RELATIONSHIPS (POSITIVE RELATIONSHIPS)**

Throughout the **travel** and tourism industry, it is believed there is a need to address an area lacking in sport tourism, informational guides and procedure. The intention of this work is to explore this area which has been totally ignored by all or most publications.

In addition to gathering the most pertinent information, a questionnaire was devised for the following reasons: (a) to verify assumptions developed over the last 24 years of **foreign** **travel** when participating as a guest and official at many **international** competitions; (b) to verify information collected from **foreign** **travel** , texts and publications; (c) to assist in the discovery of critical information overlooked during research; and (d) to provide the input necessary in the publishing of my findings and conclusions.

The final product will be an informational guidebook on the proper procedures and necessary precautions to be taken when entering a **foreign country** . This will be specifically directed at sport coaches, teams and officials. **Customs** and etiquette are expected to be learned and complied with when visiting a **foreign** **country** .

While the preceding general information was primarily gleaned from the traditional sources of related literature, specific details for each **country** presented was ascertained through the review of individual tour guides acquired through local **travel** agencies.

Two specific items, toasts and gifts, were included within the research questionnaire, which were also listed in the related literature

tour guides. It was believed that "toasts and gifts," appropriate for sport competition tours, could be quite different than those for the "typical tourist." The questionnaire responses (see Appendix **E**) reflects the compilation of materials thought appropriate to assist in sports competition **travel** tours as extracted from tour agencies literature.

In summary, the available literature, pertinent to this chapter and study, would indicate that a substantial void of information exists for sports organizers planning **foreign** **travel** competition. No professional research studies or publications were found addressing this topic. **Travel** agencies and transportation corporations have provided similar information for the more traditional tourist, but even this literature fails to provide the necessary comprehensive documentation essential to a highly successful sport competition **foreign** tour. Chapter III will describe the methods and procedures of this study. (Abstract shortened by UMI.)

PRODUCT NAMES: Passports (807958)

TITLE: Electronic **passports prep for check-in**

Electronic passports are gaining ground. However, as technologists work toward the next generation of **travel** documentation, the ramifications include political, social, and economic concerns. Debates are arising over issues that include privacy and data protection. Infineon Technologies' Secure Mobile Solutions, a German semiconductor company, is involved with projects in five countries. They are leading the way in **travel** documentations systems and in the process of collaborating with a secure printing business. Biometric data mechanisms can scan and record facial features, fingerprints, and iris prints. Several committees including the **International** Civil Aviation Organization (ICAO) are in the process of setting standards and regulations for **electronic** **travel** documents. The United States is already working on an aggressive biometrics-ID plan for **border** crossings. However, regulations vary from **country** to **country** and chip development may be delayed by this.

DOCUMENT TYPE: Newspaper JOURNAL CODE: NYT LANGUAGE: English
RECORD TYPE: Abstract

ABSTRACT:
Pres Bush is expected to accept proposal from his domestic defense advisers to merge parts of embattled Immigration and Naturalization Service and **Customs** Service into new agency that would exert firmer control over who and what enters **country** ; recommendation signals significant retreat

for Tom Ridge, director of homeland security who has advocated far more
ambitious plan that involved creating agency including other major
government entities that defend **borders** , including Coast Guard and parts
of Agriculture Department; those agencies objected; new **border** control
agency would fall under control of Justice Department despite Ridge's
concern that a more radical shift of control is required; Sen Tom Daschle,
majority leaders, expresses skepticism that new plan is the answer and
repeats his demand that Ridge testify before Congress, move resisted by
White House; photo (M)

UN officials are considering whether they should send repr to Burundi,
  where mass killings have been reptd; hold decision has been held up
  because of conflicting repts about situation; US this wk expressed
  concern to UN Sec Gen Waldheim over possibility of resurgence of mass
  killings of '72, when at least 100,000 Hutu tribesmen were reptdly slain
  by governing Tutsi minority; delegate from Belgium, which governed both
  Burundi and neighboring Rwanda as trust territories until '62, asserts
  that his country 's latest information is that there were some killings
  last mo but that there have been no new incidents recently; any UN
  mission--by Under Sec Gen B Morse or some other high official--would be
  carefully labeled as strictly humanitarian undertaking so as to avoid
  giving impression of pol intervention; purpose of mission would be
  largely to determine needs of thousands of refugees who have reptdly left
  Burundi in recent wks, fleeing across borders to Zaire, Tanzania and
  Rwanda; UN officials note that repts on situation are sketchy, often
  contradictory and difficult to verify because travel by outsiders is
  prohibited outside capital city of Bujumbura; mass slayings are said to
  have taken place in south; State Dept spokesman quotes 1 rept from area
  as saying that 10,000 to 20,000 Hutus are believed to have been killed in
  recent wks; adds that other accounts assess situation as not as grave as
  yr ago; UN delegation raised Burundi situation during talk between
  delegation member W E

Farfelues ou raisonnies, les idies des hoteliers pour attirer les to\
  SWITZERLAND: NEW MARKETING APPROACHES IN TOURISM
Le Nouveau Quotidien (ESK)   27 Jul 1995 p.7 and LaLiberti, 27 Jul 1995,
  p.8
Language: FRENCH

The Swiss tourism sector is launching various new measures to get out of
the doldrums. The new marketing approaches include free train **trips** to
the holiday **destination** , discount tickets for regional transportation in
Switzerland or payment in **foreign** currency. Some hotels, **e** .g. in
Lucerne, even convert the German mark to the Swiss franc at a rate of 1:1
to counter the negative effect of the strong Swiss currency. Two hotels in
St Gallen offer their guests a discount of SFr 10 per night if they make
their bed themselves and SFr 20 per night if they also clean their room. In
the region of Neuchbtel and Morat, French tourists can stay in a French
hotel close to the **border** and sail on Swiss lakes or do other things in
Switzerland.

AB- PROBLEM TO BE SOLVED: To facilitate countermeasures to the **electronic**
      application of each **country** , and to execute mutual use by linking
     electronic data, and to execute consolidated accounting by using the
     electronic data in each **country** . SOLUTION: A server 10 receives the
     input of account data from head office/branch offices 11, 21 and 31
     of a group enterprise through the Internet 40. The application of the
     server 10 executes account processing including the consolidated
     accounting of the group enterprise based on an **international**
     accounting rule. Also, the application of the server 10 generates an
     electronic **application / declaration** **form** corresponding to each
     country , and transmits it to accounting systems 12, 22 and 32 of
     each **country** . The accounting system of each **country** presents the
     electronic **form** to a predetermined institution after its
     confirmation/correction by an accountant or a tax accountant. Also,
     the accounting systems 12, 22 and 33 may prepare financial statements
     and generate the **electronic** **application / declaration** **form** .
     Data to be transferred are unified in, for example, XML, and this
     system is provided with a data translation converting function for
     mutual data for each **country** . COPYRIGHT: (C)2004,JPO

AB- Lee Memorial, a medium-sized hospital is attempting to revamp itself
into the hospital of the future. Lee Memorial's plan is to scrap its
centralized computer system in favor of a far more radical approach:
separate, autonomous 'focused care' networks at each unit. These
mini-hospitals will have their own networks and databases and be able
to communicate instantly with the institution's mainframes. Previously,
all information concerning patients-from accounting data to clinical
details-was stored in data centers; as Lee Memorial envisions it, all
records will now be located in workstations at the same location as the
patient. And these **electronic** records will **travel** with the
patient from **admission** through discharge, serving as the data
foundation for his or her stay at the hospital. The author discusses
this decentralised approach to health care information services.|

  INDIA: NEW SERVICES TO BE UNVEILED BY EGURUCOOL
The Times of India (TSI)   19 Oct 2000 online
Language: ENGLISH

By preying on **foreign** lands destined local students, egurucool, an education portal in India is planning to unveil **foreign** exchange, **travel** consultations, **visa** advice and other **application** services. On another note, the education portal is poised to offer over 5,000 education courses at tertiary education level for local students who are interested in pursuing their higher learning in the US. This is following a recent tie-up with a tertiary education based online marketplace, embark.com. Indian students will be able to benefit from the alliance in terms of gaining access to US-based higher learning services and content including **online application** platform, recruiter and college search facilities.

AB- <NV> NOVELTY - A financial system through the network among all of
    fingerprint organizations in the world is provided to unify all
    fingerprint organizations in the world by networking each other, and to
    decide and manage customer confirmation, admission and of transaction
    by simplifying the system in the market.|
AB- <BASIC> DETAILED DESCRIPTION - A foreigner is requesting admission by
    touching a fingerprint after inputting an ID(IDentification) code
    number and possession of any credit card to a fingerprint recognition
    terminal. A member requests the admission to a fingerprint
    organization. A domestic fingerprint organization automatically
    transmits the data received from the member to a fingerprint
    organization having nationality corresponding to the customer code. A
    foreign fingerprint organization finds a customer agreed with the
    fingerprint of a finger print DB(DataBase). The **foreign** fingerprint
    organization decides the admission by comparing the account data of the
    searched customer data with the requested amount of money to be
    cleared, transmits the decision data to a fingerprint organization with
    an **admission** number and **records** the data on a deal DB and the
    customer data. The domestic fingerprint organization sends the
    admission number to the member and **records** the transaction data on
    the DB and the member organization data.

        A **travel** agency TA is provided with an airline ticket issuing
    apparatus (11)· connected to a seat reservation system (38) via a
    communication line. This airline ticket issuing apparatus (11) is
    adapted to **record** boarding information and **immigration** card
    information, which are inputted by a person in charge, on an airline
    ticket (1). The airline ticket (1) is divided via perforations (2) into
    a recovery ticket (1a) to be recovered by a person in charge of an
    aviation company at the boarding gate and a passenger's ticket (1b) to
    be returned to a passenger. The airline ticket has on its back a
    magnetic stripe (3) extending at right angles to the perforations (2)
    over both the recovery ticket (1a) and passenger's ticket (1b). The
    airline ticket issuing apparatus (11) is adapted to record dummy data
    on the magnetic stripe (3) around the perforations (2), boarding
    information on the magnetic stripe (3) on the recovery ticket (1a), and
    immigration information on the magnetic stripe (3) on the passenger's
    ticket (1b).
        An airplane is provided has an automatic immigration card
    preparation apparatus (41), which is adapted to read immigration card
    information from a passenger's ticket (1b) carried by a passenger on
    the airline, and print necessary matters on the immigration card F on
    the basis of the immigration card information.

G06F-017/60; G06F-019/00
AB- PROBLEM TO BE SOLVED: To facilitate countermeasures to the **electronic**
      application of each **country** , and to execute mutual use by linking
      electronic data, and to execute consolidated accounting by using the
      electronic data in each **country** . SOLUTION: A server 10 receives the
      input of account data from head office/branch offices 11, 21 and 31
      of a group enterprise through the Internet 40. The application of the
      server 10 executes account processing including the consolidated
      accounting of the group enterprise based on an **international**
      accounting rule. Also, the application of the server 10 generates an
      electronic **application** / **declaration** **form** corresponding to each
      country , and transmits it to accounting systems 12, 22 and 32 of
      each **country** . The accounting system of each **country** presents the
      electronic **form** to a predetermined institution after its
      confirmation/correction by an accountant or a tax accountant. Also,
      the accounting systems 12, 22 and 33 may prepare financial statements
      and generate the **electronic** **application** / **declaration** **form** .
      Data to be transferred are unified in, for example, XML, and this
      system is provided with a data translation converting function for
      mutual data for each **country** . COPYRIGHT: (C)2004,JPO

AB- In order to adjust the development of **electronic** **applications** to
     customs and excise, and to adjust the construction requirements of
     electronic customs using EDI and the Internet, this article provides a

kind of customs audit mode focused on an electronic import/export
tracking system on the basis of the customs, an H883/EDI5.0 system and
an enterprise MRP II system. It illustrates the operation method and
gives a computational formula. The results show that the mode can speed
up the **customs** **application** cycle, improve the **customs** audit
performance and reduce the customs workload.|

AB-,Lee Memorial, a medium-sized hospital is attempting to revamp itself
    into the hospital of the future. Lee Memorial's plan is to scrap its
    centralized computer system in favor of a far more radical approach:
    separate, autonomous 'focused care' networks at each unit. These
    mini-hospitals will have their own networks and databases and be able
    to communicate instantly with the institution's mainframes. Previously,
    all information concerning patients-from accounting data to clinical
    details-was stored in data centers; as Lee Memorial envisions it, all
    records will now be located in workstations at the same location as the
    patient. And these **electronic** records will **travel** with the
    patient from **admission** through discharge, serving as the data
    foundation for his or her stay at the hospital. The author discusses
    this decentralised approach to health care information services.|

RECORD TYPE: Abstract

ABSTRACT:
    Precautions taken by **foreign** governments and businesses because of
possibility of war between India and Pakistan are causing havoc in India;
travel warnings have all but emptied **country** of both tourists and
businesspeople from developed countries; evacuations of embassy and
consular employees have left no one to process **visa** **applications** from
Indian businesspeople or to answer questions about **customs** , trade and
other regulations; moving goods in and out of some parts of **country** is
becoming difficult; Indian companies find themselves fielding floods of
inquiries about whether it is safe to keep doing business; some
businesspeople comment; photo (M)

US Treas announces final regulations under '70 law aimed at curbing abuses
  of secret foreign bank accts by organized and 'white collar criminals';
  regulations, effective July 1, require that anyone carrying $5,000 or
  more in cash or travelers checks out of country must fill out form
  and turn it in to Customs officer, that banks and other financial insts
  rept to Treas all 'unusual' currency withdrawals of more than $10,000,
  that insts keep records for 5 yrs of all transfers into or out of US of
  more than $5,000 and records for 2 yrs 'which would be needed to
  reconstruct deposit or share acct and to track check deposited in such
  acct')

egurucool ties up with embark.com
  INDIA: NEW SERVICES TO BE UNVEILED BY EGURUCOOL
The Times of India (TSI)   19 Oct 2000 online
Language: ENGLISH

By preying on **foreign** lands destined local students, egurucool, an education portal in India is planning to unveil **foreign** exchange, **travel** consultations, **visa** advice and other **application** services. On another note, the education portal is poised to offer over 5,000 education courses at tertiary education level for local students who are interested in pursuing their higher learning in the US. This is following a recent tie-up with a tertiary education based online marketplace, embark.com. Indian students will be able to benefit from the alliance in terms of gaining access to US-based higher learning services and content including **online application** platform, recruiter and college search facilities.

Why interdiction?   Immigration control at the United States--Mexico border
Heyman, Josiah McC
Regional Studies   v33n7   PP: 619-630   Oct 1999
ISSN: 0034-3404   JRNL CODE: IRST
WORD COUNT: 9997

...TEXT: illegally,   a   desire   that is also addressed by the port issuing
border crossing cards.

The   **border   crossing   card**   , an informal mechanism peculiar to the
US-Mexico border, permits the bearer to go to...

... inspection even though she had a card, because her pattern of crossings
(seen   on the   **computer**) suggested to the inspector that she was living in
the US, not just visiting there...

...are? One clue is to be found in the family influence of the young woman.
Border   crossing   cards indicate how local social relations bend and
limit the US state, not only in the...
... also in the very need for routine ways to penetrate the boundary, which
reflects   the   **web**   of   kinship, friendship and visiting relations on the
border (see HEYMAN, 1991). Humane though this...

... and   thus   constitute   an   important   retail market (see PATRICK, 1996;
PATRICK and RENFORTH, 1996). The **border   crossing   card** , often called a
'shopping   card',   facilitates this commerce. In both instances, the strict
nationalist model...

Detailed Description

... used.

Other information is also gathered automatically, when the passenger
enters information into an electronic **customs form** 724 on a computer
interface
and stores the information on a computer or computer memory...726, and
stored
12
in a computer. When the passenger boards an aircraft or other
international mass **travel** medium, such as a ship or a bus, his or her
identity may be verified...

...automatically concerning the passenger is sent to a government 730 or
governmental agent in the **destination country** . This information may
include the passenger's identity, the **customs** declaration, the
passenger's electronic image, an inspection image or result from a
baggage inspection, and any other information required by the government
of the **destination country** . The government then sends instructions
732 to the airline or **travel** company concerning any passengers in whom
the government has an interest or passengers the government wishes to
proceed to customs or immigration.

While the information is being processed, the **international** passenger
is
also being processed according to the flowchart depicted in Fig. 8. The
passenger checks in with the airline with which he or she has scheduled
travel 806. After providing information concerning his identity, his
image, and the **customs form** , the passenger may board the aircraft
808 or mass **travel** medium and proceed to the **destination country** 81
0. The passenger deplanes the aircraft or **travel** medium 812 and
proceeds to an Immigration booth 814. At the.

Immigration booth, the airline or transport company provides the
passenger with instructions, according to whether the government of the
destination country has an interest in the passenger, or the baggage,
or neither. The passenger then proceeds to customs, to immigration, or to
a **destination** of his or her own choice 816. The process may also be
used without all...aircraft may have a computer interface to customs
officials in the in-bound
1 3
 country . In one embodiment, for **travel** from an out-bound **country**
900 to an inbound **country** 910, passengers on an aircraft 920 may fill
out customs forms at
an on-board computer interface. The data may then be transmitted 930 to
officials in the in-bound **country** . After review, the officials may then
notify 940 passengers on the aircraft as to who...

...from the basic features of this
invention. For example, passports are normally required for passengers
 traveling from one country to another. However, the growth of
international travel and the proximity of some countries may lead to
treaties

Claim
... second computer memory.

25 The method of Claim 23, further comprising filling out an electronic
customs form and saving the **form** into a memory of a computer.

26 The method of Claim 23, wherein the passenger...

  Claims

Claim

... contacted us in the last six weeks wanting better service'. Business today is becoming increasingly **international** and is not conducted only in English.% Additionally the Internet contains useful information in many...case of the word 'fly' (as in an action) this was cited as 'do & move & **travel** & fly.' Establishing such a Concept Hierarchy enables a computer to respond to queries such as...

...Joe move?' - Querying for any entry in the'do & move'grouping. 'HowdidJoetravel?' -Queryingforanyentryinthe'do&move& **travel** 'grouping or "how did Joe go?" - the word 'go', in this instance, has the same...

...of actions, not the meaning of the physical objects. Their Concept Hierarchies are:
do & move & **travel** & fly
do & move & **travel** & bus
do & move & **travel** & car
The words 'fly' 'bus' 'car' (as actions) are values in (members of) the Data Class named' **travel** '. ' **Travel** ' is itself one value in the data Class of 'Move'-other members might be 'slide...ed'adds the'past time'concept to an action word. For example'walk'= do & move & **travel** & walk. 'Walked' - with the addition of the '-ed' suffix, codes the additional concept of 1past time'into walk., to give 'do & move & **travel** & walk & past time'per the CoReducing Concept method.
5) Operator Compression Coding. Operator Words can...that is the basis of the rule.
The Concept Hierarchy for'roarn' is 'do & move & **travel** & roarn'and contains no mention of telephones However, the definition (given in an earlier example...e-mail address will fail. Supposing that the fourth e-mail address was in another **country** because Joe is abroad, and the user says 'Send an e-mail to Joe's...

...facilitates processing them. A Concept Hierarchy for a given word consists of several Move = 444
Travel = 4 44 199
Fly 4 44 199 3416
Then the Number Concept Language for'fly...

...that begins with 4 is an acceptable answer. If the user asks, 'how did Joe **travel** ?' this translates to 'How did Joe 4 44 199?'and any value in the Data...
